

Course Outline

So far in this course, we have covered:

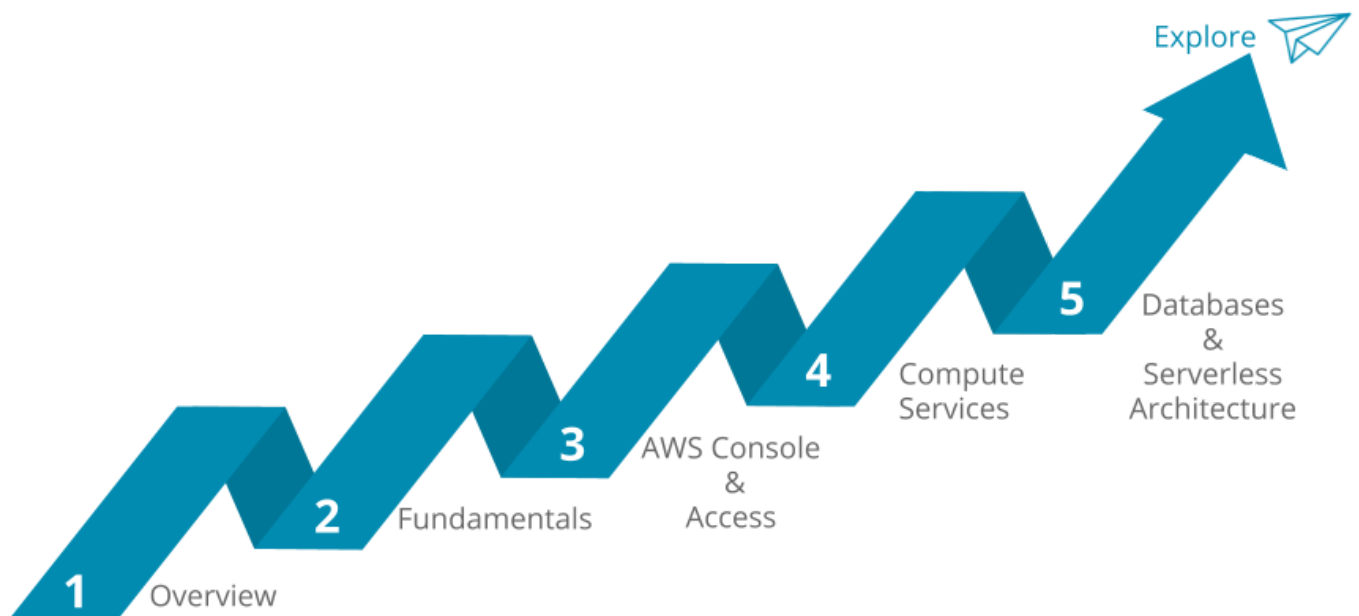

- Overview
- Fundamentals

In this lesson, we will focus on:

- AWS console and AWS services
- Identity and Access Management (IAM)
- Creating IAM User and Policies
- Creating and using S3 bucket

In future lessons we will cover:

- Compute services
- Databases and serverless architecture

Lesson Outline

This lesson covers signing up for AWS, navigating and interacting with AWS services via the console, and creating

- IAM users
- IAM policies
- S3 buckets

Learning Objectives

By the end of this lesson, you will be able to:

- Sign up for AWS services
- Secure your AWS root account using multi-factor authentication
- Navigate AWS services via the console
- Create an S3 bucket
- Create an IAM user
- Configure an IAM inline policy to permit reading and writing to an S3 bucket
- Browse an S3 bucket
- Upload files to an S3 bucket
